DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Howard et al. (Howard) (S 6,823,526).

With regard to claims 1-20, Howard either explicitly or inherently teaches all of the claimed limitations which is evidenced by that fact that Howard discloses a system for connecting an external device and a host system that includes an input/output code element on a host system linked with an external device. (Note "interface module" (see lines 27-46 of column 5), "printer driver" (see lines 27-46 of column 5) and "add-on module" (column 5, line 26 – col 9, line 64) as claimed by the applicant and taught by Howard et al. (Howard) (S 6,823,526).

Response to Arguments

3. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.
